Work Completed this Week:

Observations (Sediment Control / Erosion Control Notes, Landowner Issues, etc.):

Sediment control devices at all locations are in good order. Sefkar unloading site needs to dry out before soil is pushed, all trucks are now heading to Menchoff unloading . Moon pool is being used on excavator barges. Clam-shell will be replaced by a bucket on excavator to increase dredging efficiency. Trucks have internal scales and are loaded by weight. More accurate numbers can be given as truckloads, with each truck load carrying between 14-19 CY.
